

Front Yard Coop

## + JUST ADD CHICKENS.

Imagine being able to wake up in the morning and go out to your front lawn to get eggs for breakfast. Store-bought can't compare. Make no mistake, this is not your Grandmother's Chicken Coop!

The Front Yard Coop makes it easy to raise chickens at home. It is the complete solution! Pour in food. Pour in water. Add chickens...and you are on your way.

- **ECO-GREEN:** It's eco-friendly, good for your lawn and can run solely on solar power!
- **KIDS:** It is fun for your kids, and it takes away all the traditional worries of raising animals.
- **SAFETY:** Unlike most coops, The Front Yard Coop has a built in electric fence, keeping predators out. Switch it on and create a safe haven for your chickens from raccoons, hawks and other predators, and peace of mind for you.
- **CONVENIENCE:** Away for the weekend? The Front Yard Coop has storage for several days of food and water and an automatic system for dispensing them.
- **BEAUTIFUL:** Its welded aluminum frame and bead board siding make it sturdy, its artistic design makes it attractive.
- **MOTORIZED:** A unique motorized version travels along at a subtle 12 feet per hour, controlled by sophisticated circuitry, sensors tell it when to reverse, when it is night and time to shut down.

WE have, over the years, made all the mistakes. These coops represent solutions from our 30 years combined experience. We are convinced we are offering the ultimate in safety, care, health and ease. Stress free!!!!!!!

The best of everything! A chicken coop to be proud of!
